***Let the Records Show: A Practical Guide to Power of Attorney and Estate Record Keeping* By Linda A. Alderson, Douglas A. Alderson**

Rating:

Very good content

I am a recently appointed executor trying to clean up after a prior power of attorney who, to put it mildly, did not do due diligence and was "winging it". Even though the book is written from the Canadian point of view, the information about record keeping is applicable to the United States. The chapter on things that go wrong was especially good. This book should be required reading for anyone contemplating taking on the role of executor or power of attorney, or already doing it and maybe not quite doing it right.
